# Dichiarazione UE

## PEOPLE AT THE CENTRE

Digital technologies should protect people's rights, support democracy, and ensure that all digital players act responsibly and safely. The EU promotes these values across the world.

## SOLIDARITY AND INCLUSION

Technology should unite, not divide, people. Everyone should have access to the internet, to digital skills, to digital public services, and to fair working conditions.

## FREEDOM OF CHOICE

People should benefit from a fair online environment, be safe from illegal and harmful content, and be empowered when they interact with new and evolving technologies like artificial intelligence.

## PARTICIPATION

Citizens should be able to engage in the democratic process at all levels, and have control over their own data.

## SAFETY AND SECURITY

The digital environment should be safe and secure. All users, from childhood to old age, should be empowered and protected.

## SUSTAINABILITY

Digital devices should support sustainability and the green transition. People need to know about the environmental impact and energy consumption of their devices.

[Home](#) [News & Views](#) Commission launches consultation on AI Act prohibitions and AI system definition

PRESS RELEASE | Publication 13 November 2024

## Commission launches consultation on AI Act prohibitions and AI system definition

The Commission's Artificial Intelligence (AI) Office is launching a targeted stakeholders consultation process on the future guidelines on the AI system definition and the implementation of AI practices that pose unacceptable risks under the AI Act.

The guidelines will help national competent authorities as well as providers and deployers in **complying with the AI Act's rules** on such AI practices ahead of the application of the relevant provisions on 2 February 2025.

The AI Office invites stakeholders, including **AI systems providers, businesses, national authorities, academia, research institutions and civil society** to submit their input. The contributions received will feed into the Commission's guidelines on the definition of AI system and prohibited AI practices under the AI Act, to be published in early 2025.

The legal concepts regarding the AI system definition and prohibited AI practices are established in
