Joint Research Centre

Managing reference codes

- **Registry:** information system on which reference codes are maintained
- **Register:** set of files containing identifiers assigned to items with descriptions of the associated items
- Main operations
 - Create
 - Store/serve
 - Update
 - Clarification
 - Supersession
 - Invalidation
 - Retirement

Why do we need registries in INSPIRE?

Key infrastructure components to

- allow unambiguous references to items
- provide unique and persistent identifiers for resources
- allow their consistent management and versioning

Central INSPIRE registry contains registers for

- Themes
- Code lists and values
- Enumerations and values
- Feature concepts
- Metadata code lists and values

Reuse experience [v1.2 & v1.3]

- code list register, no issues for adding and maintaining the content
- Resolve issues with "Austrian data provider register" not a code list, a new register item
 - digits as label not accepted "0115"
 - strong JRC support, **v1.3.1** is running
- Data import module, needs experience to apply the correct order
 - Addition, Clarification, Retirement
 - Retirement (recursive children items) not always comprehensible
- Data import difficult & complex, but designed by purpose

Reuse experience

- Easy implementation thanks to detailed software documentation and to prompt support from the JRC team.
- Provided feedback to improve the application, as e.g.:
 - support to numeric ID (included in the version 1.3.1);
 - management of 2+ hierarchical levels in the registers.
- Customisation of the interface to comply with Italian guidelines on design.
- Registry published under the coordination activities carried out by AgID, ISPRA and Ministry of the Environment.

The beta version will be on line at the end of September at the URL http://www.registry-inspire.rndt.gov.it

Re3gistry version 2

User feedback

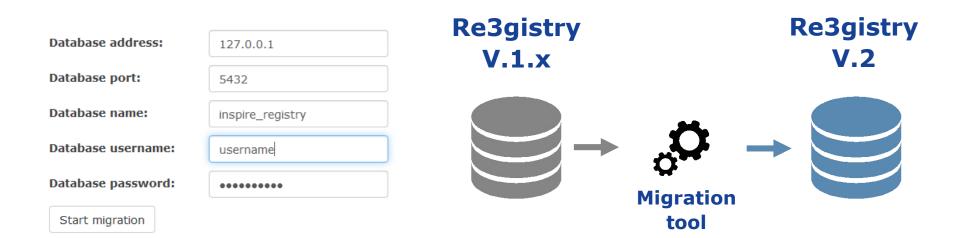

- Backward compatibility with Re3gistry >= v1
- User friendly editing interface
- ISO 19135 workflow
- Better handling of the service (Solr instead of static files)
- API (direct calls)
- Simple software installation (also via Docker)

Backward compatibility with Re3gistry >=1

User friendly editing interface

- Create, edit, update registers, items, fields
- Handle localization of each field and the related field's label
- Manage the ISO 19135 workflow in a visual way
- Manage users, roles and groups

English (en) About | Contact | Privacy policy | Legal notice **RE3GISTRY 2** European Commission Reference codes management tool European Commission > Re3gistry 2 🕈 Home page 🛷 Content 📌 Itemclasses & Fields 📌 Workflow C+ Logout Manage the content nl sl en CS bq da et fi fr hu lt lv mt pl pt го sk sv hr URI http://inspire.ec.europa.eu/theme 0 Label * INSPIRE theme register Content summary The INSPIRE theme register contains all spatial data themes, as defined in the \wedge Annexes of the INSPIRE Directive (Directive 2007/2/EC of the European Parliament and of the Council of 14 March 2007 establishing an Infrastructure for Spatial ~ Information in the European Community (INSPIRE)). The descriptions of the themes Registry INSPIRE registry Register manager * European Commission, Joint Research Centre Register owner * European Union Control body INSPIRE Maintenance and Implementation Group (MIG) * Submitting organizations Members of INSPIRE Maintenance and Implementation Group (MIG) *

User friendly installation

- Install wizard
- Automatic initialization
- Option to install the system using docker

Extensibility

• Adapt your model with any custom fields you need

Manage the fields

List order	Label	Туре	Href	Hidden	Multivalued	Required	Table visible	Actions
40	Label	String						Un-map field
41	Content summary	String						Un-map field
42	Registry	registry						Un-map field
43	Register manager	String						Un-map field
44	Register owner	String						Un-map field
45	Control body	String						Un-map field
46	Submitting organizations	String						Un-map field
47	Contact point	String						Un-map field
48	License	String						Un-map field

Showing fields for item class: metadata-codelist (register)

- Easily adapt the service User interface to fit your branding
- Create your own persistence driver by just implementing the described interfaces

Other important features

 New Apache Solr[™] based service handling (no more static files export)

- Restful API
- ISO 19135 Workflow

Re3gistry version 2 – Development status

- ✓New architecture
- ✓ Definition of roles and workflows
- ✓Database
- Migration
- Editing interface
- ≻APIs
- Solr handler
- Service frontend

... available soon ...
