L' IA in Italia: lo stato dell'arte, progetti strategici e scenari futuri

Andrea Orlandini

Istituto di Scienze e Tecnologie della Cognizione
Consiglio Nazionale delle Ricerche

Outline

- State of the Art
 - (brief) AI history
 - The Italian Association for Artificial Intelligence (AIxIA)
- Projects (some)
 - A.I, Data and Robotics Association (EU)
 - Future of AI Research (IT PNRR)
- Future scenarios
 - Italian Strategy for Artificial Intelligence
 - AI ACT
- Opportunity and Challenges

What is Artificial Intelligence?

- A science studying computational techniques to emulate natural intelligence
- Artificial methods usually differ from biological ones
- How to measure the performance/quality of AI systems?
 - Utility functions?
 - Ethical issues?

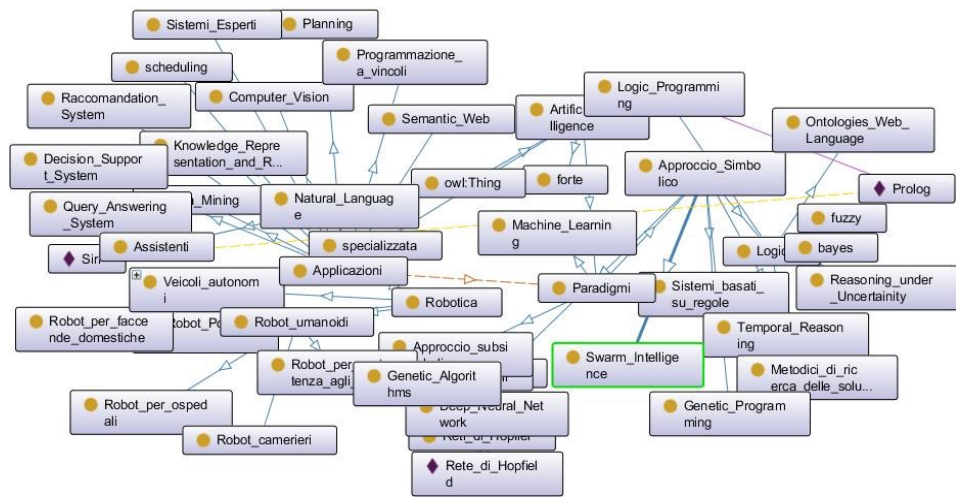

Symbolic

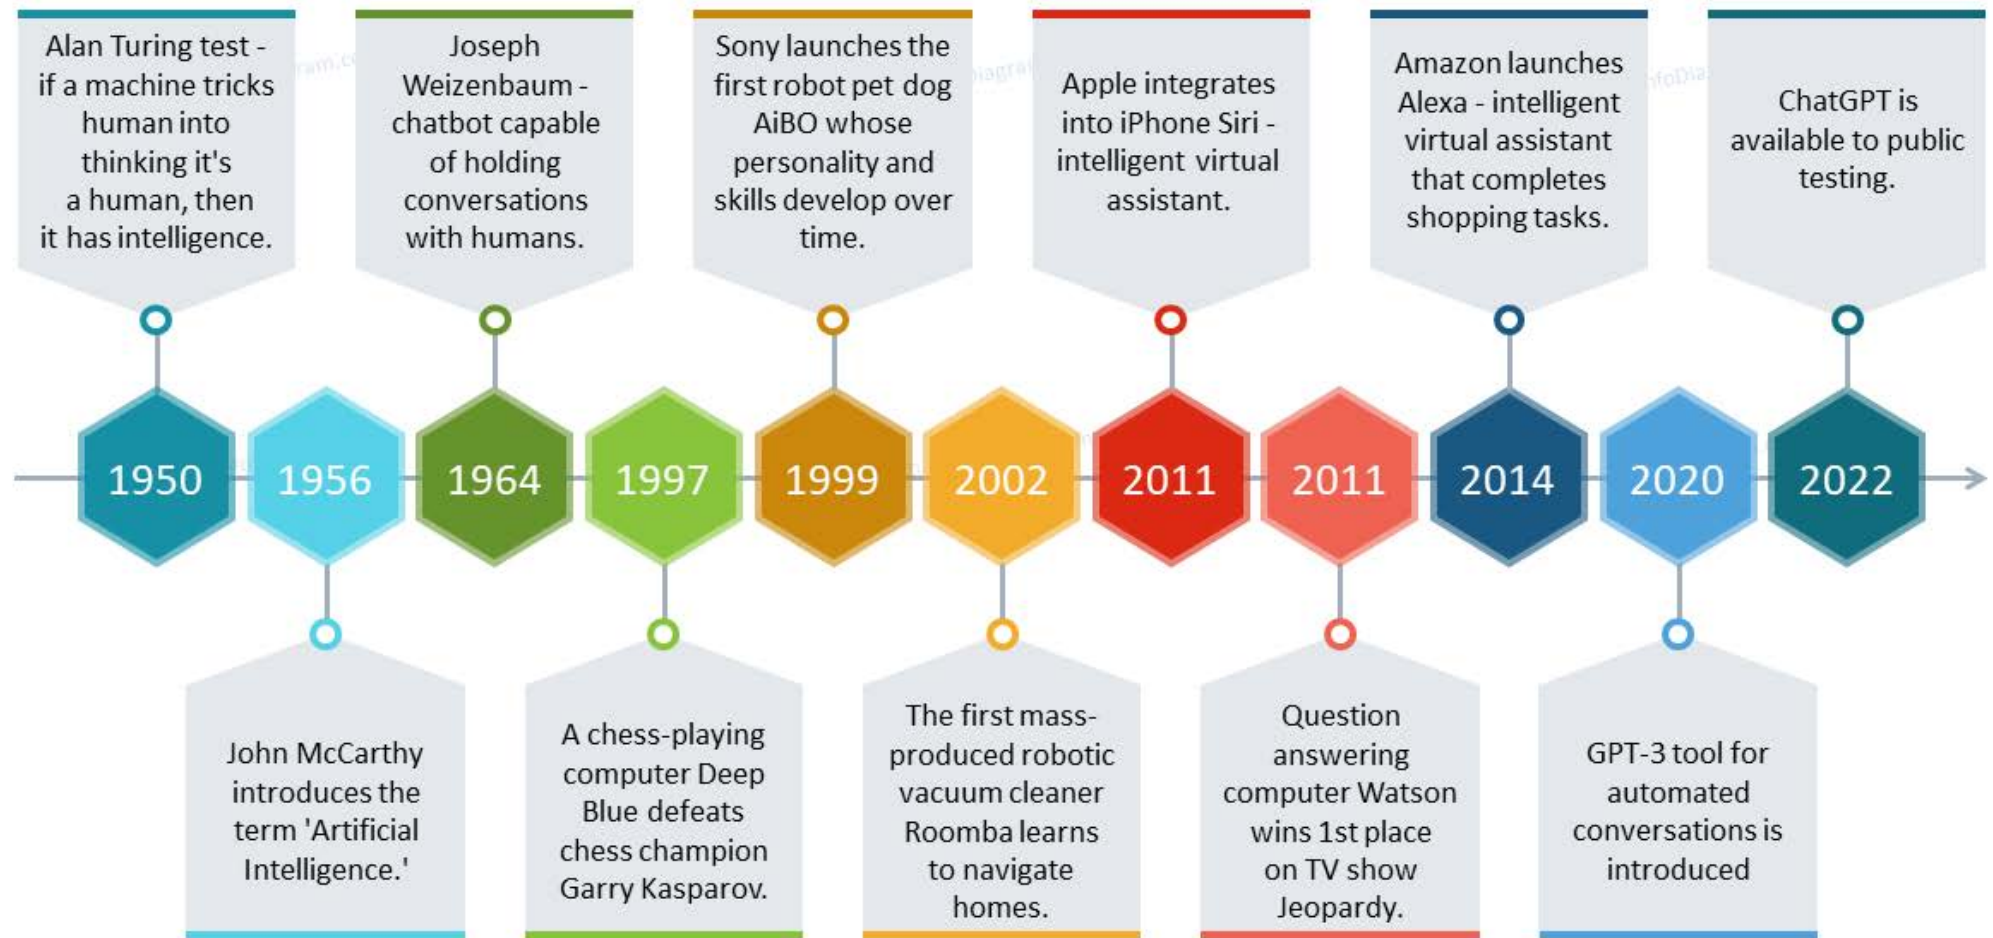

General or strong

SubSymbolic

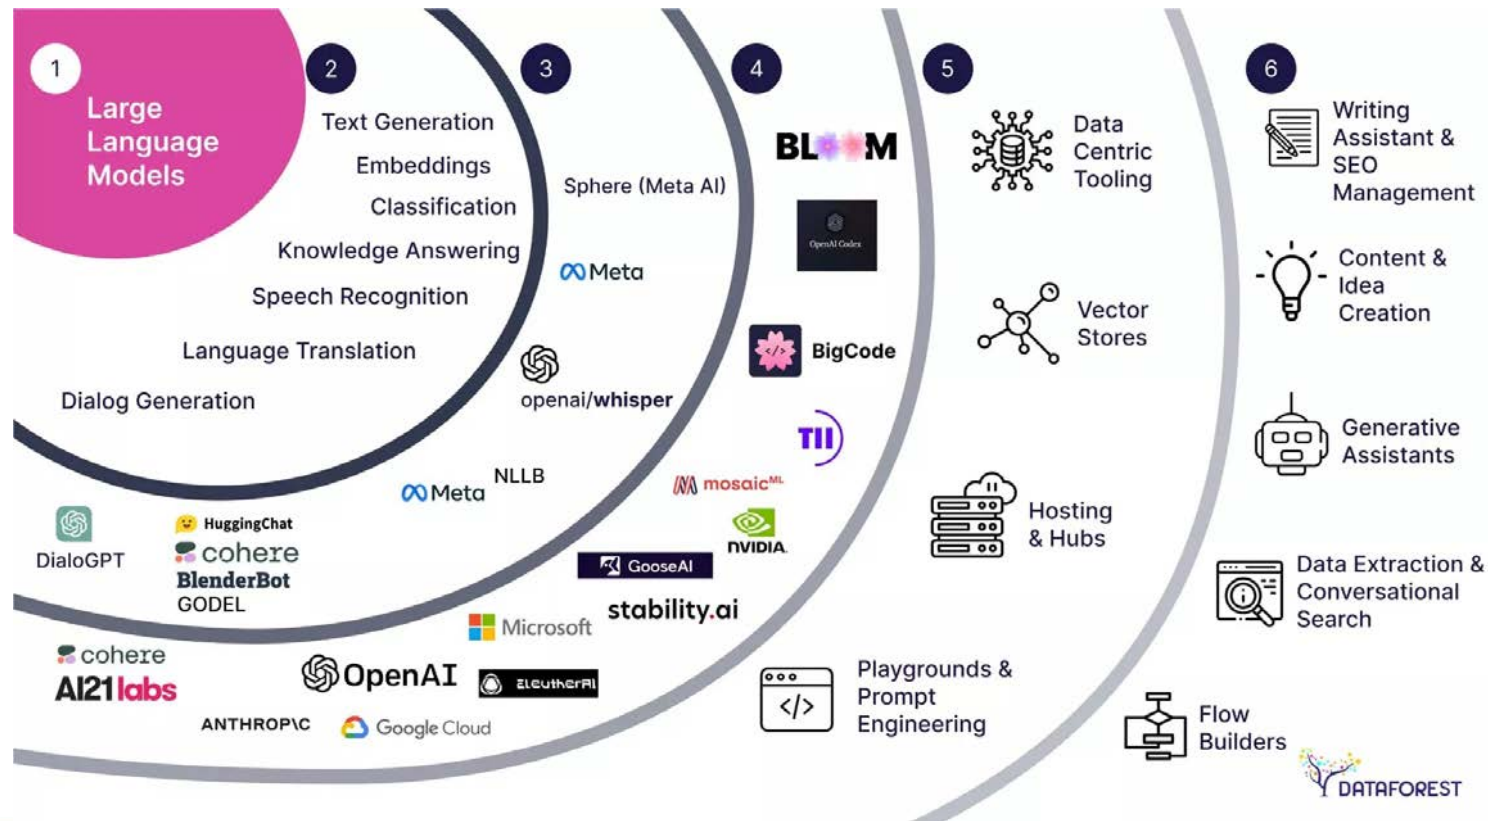

Specific or weak

Artificial Intelligence Development History Timeline

Large Language Models

Associazione
Italiana per
l'Intelligenza
Artificiale

The Italian Association for Artificial Intelligence

AlxIA in a Nutshell

1988 Born as a member of the European Association for AI

- It brings together the **Italian community**
- More than **2.500 members**

Its aim is that of **increasing knowledge** of Artificial Intelligence, **encouraging its teaching** and **promoting theoretical and applied research** in the field through seminars, targeted initiatives and sponsorship of events.

Organization

Gianluigi Greco
Presidente

Davide Bacciu
Vice-presidente

Chiara Ghidini
Vice-presidente

Gabriella Cortellessa
Segretario

Roberto Micalizio
Tesoriere

Stefano Ferilli

Industrial Board

Scientific Board

Working Groups

Working Groups

- **Argomentazione** in Intelligenza Artificiale
- Apprendimento automatico e data **mining**
- Elaborazione del **linguaggio naturale**
- Intelligenza artificiale ed **ageing**
- Intelligenza artificiale e **cybersecurity**
- **Rappresentazione della conoscenza** e ragionamento
- AI e **robotica**
- Intelligenza artificiale per il **patrimonio culturale**
- Paradigmi economici e **ragionamento strategico**
- Intelligenza artificiale per la **salute**

new

- **BPMItaly**
- **Aspetti filosofici** dell'intelligenza artificiale

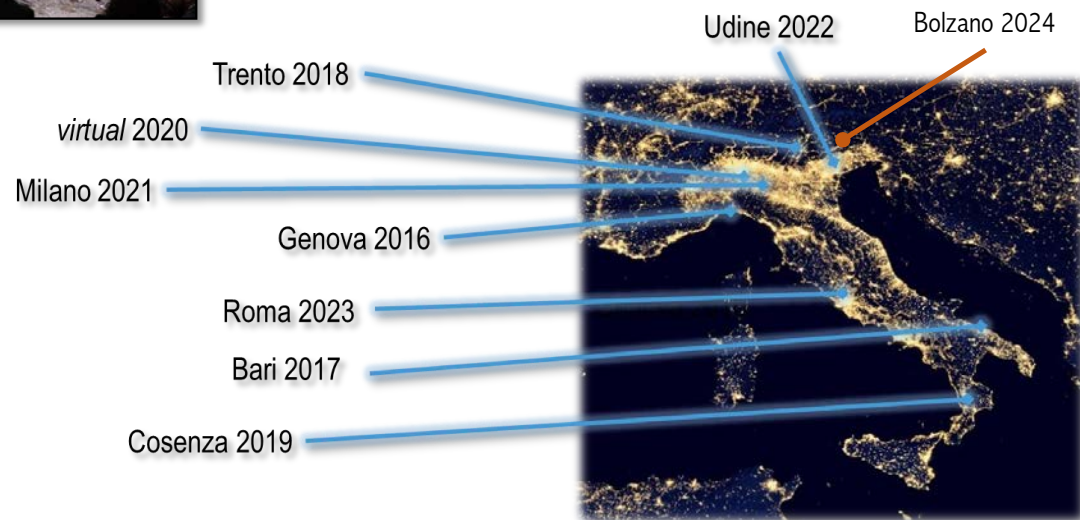

new

- AI per l'Educazione
- **Quantum AI**

EUROPE
DIRECT

Annual Congress

THE EUROPEAN
CONFERENCE
ON ARTIFICIAL
INTELLIGENCE

ECAI-2025

*October 25-30, 2025
Bologna (ITALY)*

F. Chesani, M. Milano, A. Omicini

Awards

Marco Somalvico Award - biennial

- Best young Italian researcher in AI

Marco Cadoli Award

- Best Ph.D Thesis in AI

Leonardo Lesmo Award

- Best M.SC Thesis in AI

Summer Schools

AlxIA - Italian Association for Artificial Intelligence
International Summer School

ADVANCES IN ARTIFICIAL INTELLIGENCE

Lake Como School of Advanced Studies
September 23-27, 2024
Villa del Grumello (Como, ITALY)

AI Forum

AI FORUM
INTELLIGENZA ARTIFICIALE
PER LE IMPRESE

VI EDIZIONE
Il Forum dell'Associazione Italiana
per l'Intelligenza Artificiale dedicato alle imprese

4 APRILE 2024
Palazzo Mezzanotte, Milano

Public Events

FAIR Il partenariato esteso sull'intelligenza artificiale

FAIR Partners

12 PUBLIC INSTITUTIONS CONTROLLED BY MUR

2 HUB MEMBERS ONLY

Other 6 PUBLIC/PRIVATE INSTITUTIONS

7 COMPANIES

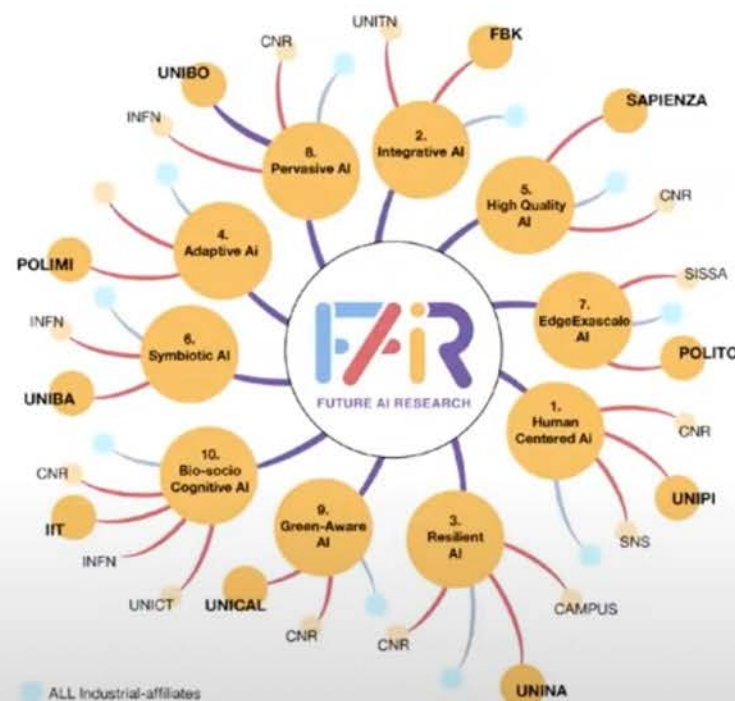

Hub & Spoke Organization

In line with the **National Strategic Program for AI**, FAIR aims to:

- Advance frontier research in AI to **make Italy a global research and innovation hub of AI**;
- **Reduce** AI research **fragmentation**;
- Create **human-centered, trustworthy and sustainable AI**;
- Foster **AI-based innovation** and development of AI technology;
- Create, retain attract **AI talent** in Italy.

To achieve FAIR goals, we have designed a very ambitious research program organized into 10 spokes, with a coordination Hub: the FAIR foundation.

Each spoke has its own thematic characterization.

AI, Data, Robotics Forum

#ADRF23

Adra Strategic Research, Innovation, and Deployment Agenda (SRIDA)

Fredrik Heintz, Linköping University & Adra

European Commission and the AI, Data and Robotics Association sign partnership to jointly invest 2.6 Billion €.

A Memorandum of Understanding establishes the co-programmed partnership that will serve as European focal point for AI, Data and Robotics.

[MORE INFORMATION](#)

A joint initiative by:

<https://adr-association.eu/>

Secure **European's sovereignty** over AI, Data and Robotics technologies and knowhow

Establish **European leadership** in AI, Data and Robotics technologies with high socio-economic and environmental impact

Reinforce a **strong and global competitive position** of Europe in AI, Data and Robotics

STRATEGIA PER LE IMPRESE

STRATEGIA PER LA FORMAZIONE

MONITORAGGIO DELLA STRATEGIA

The EU AI ACT

- UE Regulation
- Objectives
 - Ensure that AI systems in the EU are safe and respect fundamental rights & Union values
 - Ensure legal certainty to facilitate investment & innovation in AI
 - Facilitate the development of a single market for lawful, safe and trustworthy AI applications
- AI ACT: application from 2nd February 2025
 - Agenzia per l'Italia Digitale (AgID)
 - Agenzia per la Cybersecurity Nazionale (ACN)

Outline

- State of the Art
 - (brief) AI history
 - The Italian Association for Artificial Intelligence (AIxIA)
- Projects (some)
 - A.I, Data and Robotics Association (EU)
 - Future of AI Research (IT PNRR)
- Future scenarios
 - Italian Strategy for Artificial Intelligence
 - AI ACT

- Opportunity and Challenges

RESEARCH THROUGH AI: OPPORTUNITIES

- **Data Integration Across Disciplines**

AI can process and integrate large datasets from different field **revealing connections that might otherwise go unnoticed.**

- **Predictive Modeling**

AI could help forecasting disease outbreaks by analysing, e.g., environmental, biological, and social data. AI models could also be useful to **predict weather patterns, assess risks, and simulate environmental impacts**, helping guide proactive measures.

- **Resource Optimization and Sustainability**

AI helps researchers **optimize the use of resources** by identifying the most impactful areas for intervention.

SOME AMONG THE POSSIBLE RISKS

Warnings

- **Overreliance on AI Outputs**
Some people view AI too optimistically, almost as if it were an "oracle," and may place excessive trust in its outputs.
- **AI "Hallucinations" and Unreliable Outputs**
AI sometimes generates erroneous or bizarre results showing that it's not yet fully reliable.
- **Lack of Transparency and Interpretability**
Many advanced AI models operate as "black boxes," making it difficult to understand how they reach specific conclusions.

MORE IN GENERAL: TWO LEVELS OF RISKS

Privacy Violations

AI often requires large amounts of data, including personal information. This data can be vulnerable to misuse or breaches, leading to invasions of privacy.

Bias and Discrimination

AI systems can inherit biases from their training data, leading to unfair treatment or discriminatory outcomes

Security Risks Due to AI Vulnerabilities

AI systems can be targeted by hackers to manipulate outcomes or exploit weaknesses, posing indirect security threats to individuals.

Job Displacement

Automation through AI is leading to job losses in certain industries, especially in repetitive or manual tasks, impacting livelihoods.

Misinformation and Manipulation

AI can be used to generate convincing fake content (e.g., deepfakes), spreading misinformation or manipulating public opinion.

A SET OF POSSIBLE ADVICES

- **Expert Identification of AI Limitations and provide Usage Guidelines**

AI experts should clearly identify the limitations of AI systems, defining **usage boundaries** and setting **best practice** and **use guidelines**.

- **Increase Awareness of AI Risks**

Research institutions should communicate AI risks more effectively, providing **accessible information** to ensure users understand **potential pitfalls**.

- **Enhance Training and Education to prepare users**

Invest in **education and training programs** to improve **AI literacy** among other researchers, people in general, equipping them to make informed and cautious use of AI in their fields.

Preventive measures rather than corrective ones!
