

# **Introduzione ai dati aperti**

# Il valore dei dati

La **rivoluzione industriale (1760 - 1830)** è un processo di evoluzione economica che da un sistema agricolo-artigianale-commerciale porta ad un sistema industriale moderno caratterizzato dall'uso generalizzato di macchine azionate da energia meccanica e dall'utilizzo di nuove fonti energetiche inanimate (come ad esempio i **combustibili fossili**).

**CARBONE**

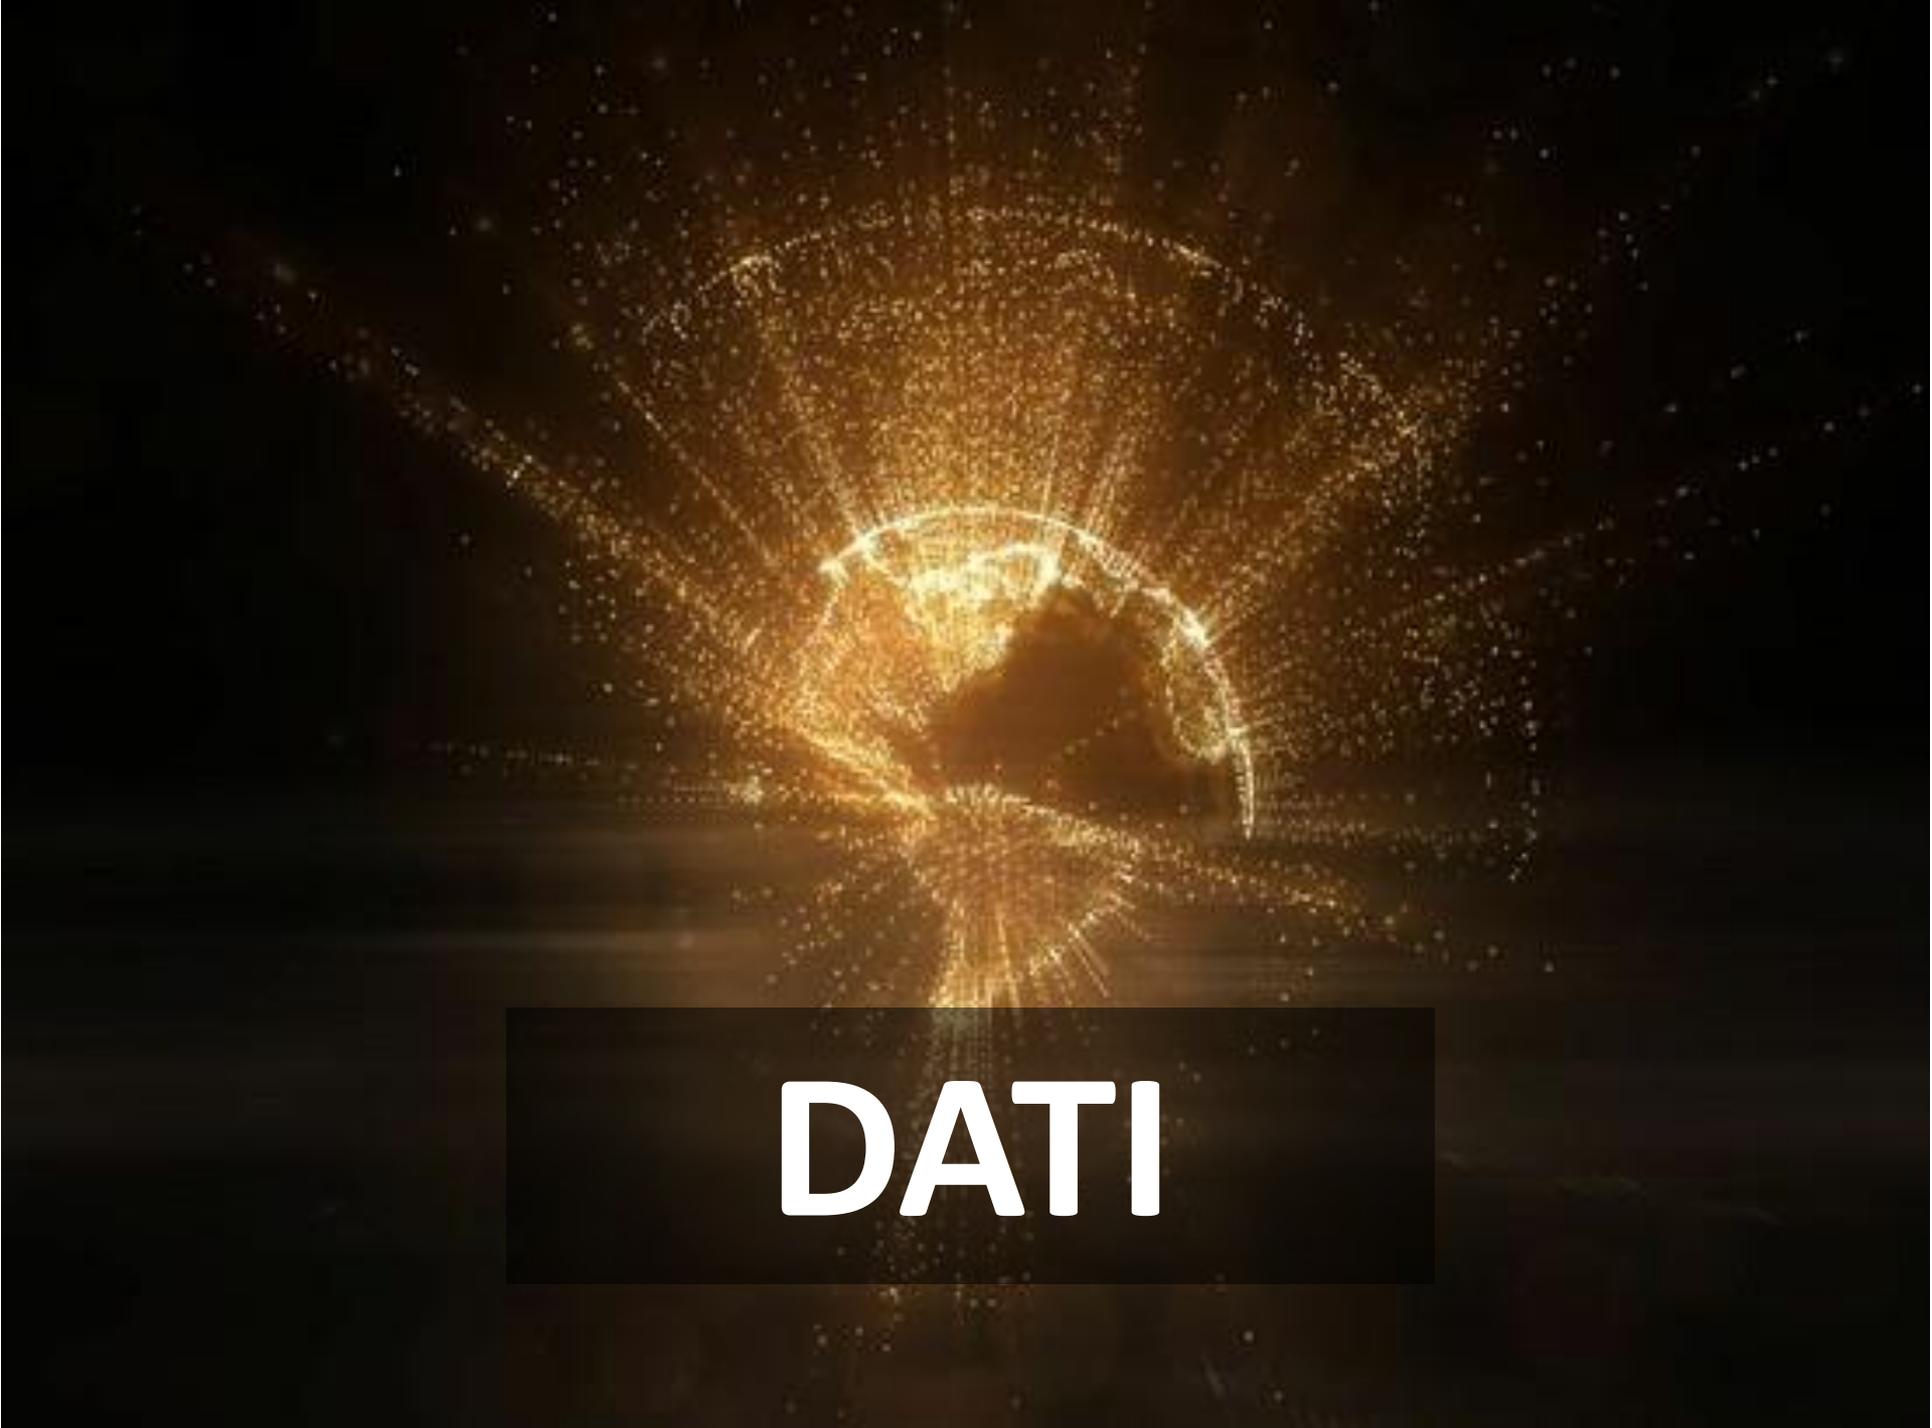

**La seconda rivoluzione industriale (1856-1900)** è il processo di sviluppo industriale il cui inizio viene cronologicamente riportato al periodo compreso tra il congresso di Parigi e quello di Berlino e che giunge a pieno sviluppo nell'ultimo decennio del 1800.

# PETROLIO

Con l'espressione **terza rivoluzione industriale** si indicano tutta quella serie di processi di trasformazione della struttura produttiva, e più in generale del tessuto socio-economico, avvenuti nei paesi sviluppati occidentali del primo mondo a partire dalla seconda metà del Novecento.

A glowing, golden, particle-based globe or data visualization against a dark background. The globe is composed of numerous small, bright particles that form a dense, spherical structure. The particles are arranged in a way that suggests a complex, interconnected network or data structure. The overall effect is one of dynamic energy and digital connectivity.
